Problema 6-Rezervari de locuri

ID and name	UC-1: Reserve		
Primary actor	Spectator	Secondary actors	Theatre Managing System
Description	A user accesses the Theatre Managing System from either the corporate intranet or external Internet, views the title of the show ,all the seats and if they are available or not, he can then select the seats that he wants to reserve, enters his info and place the reservation with a button		
Trigger	A user indicates that he wants to reserve one or more seats		
Preconditions	PRE-1. User is logged into the System PRE-2. There are available seats for reservation		
Postconditions	POST-1. Reservation is stored in the Managing System linking the info of the user to the seats POST-2. The seats availability is updated to reflect the reserved seats POST-3. If all the seats are reserved, all the others users accesing the app in that day will be unable to use the Reserve function		
Normal flow	**1.0 Making a reservation** 1. The user selects the number of seats he wants to reserve 2. The system verifies if there are enough available seats 3. The system show the seats placement and their availability 4. The user selects from the available seats the ones he wants to reserve 5. The user inserts his info 6.When the user is satisfied with the reservation he uses the reservation button 7. The system saves his reservation informations 8.The systems shows a confirmation messaje and updates the list for all the users		
Alternative flows	1.1 Adding more seats to the reservation 4.1 The users selects more seats for the reservation 5.1The system updates the new reservation		
Exceptions	**1.0 E1 The number of available seats is less than the number of seats selected by the user**		

	1.The system informs the User that the number of available seats is less than the number he requires
	2a.If the users cancels the reservation making process then the system terminates the use case
	2b. Else if the user selects a smaller number of seats that is less or equal with the number of available seats the process continues

ID and name	UC2-Login		
Primary actor	User	Secondary actors	Theatre Reservation System
Description	The login page in witch the user enters his/hers email and password to connect to the reservation app
